Opening Facebook links in external browsers

We've heard feedback that ad-blocking software doesn't work when websites open via the Facebook app, using Facebook's in-app browser.

Follow these steps on any Android phone or tablet to force the Facebook app. to open any links in your preferred external browser (usually Google Chrome).

- 1 Log into the Facebook app.
- 2 Tap the 'Hamburger icon' (three horizontal parallel lines) in the top-right corner of your screen.
- 3 Tap 'Settings & Privacy'
- 4 Tap Settings
- 5 Tap 'Media and Contacts'
- 6 Toggle the 'Links open externally' button to on.

This solution may stop working because Facebook regularly updates their settings.
